

PLEASE REMEMBER ALL STEELWORK TO BE MANUFACTURED TO A STRUCTURAL ENGINEERS SPECIFICATION. THIS DRAWING IS TO SHOW HOW TO USE THE PLAS-PRO SECTIONS ONLY.

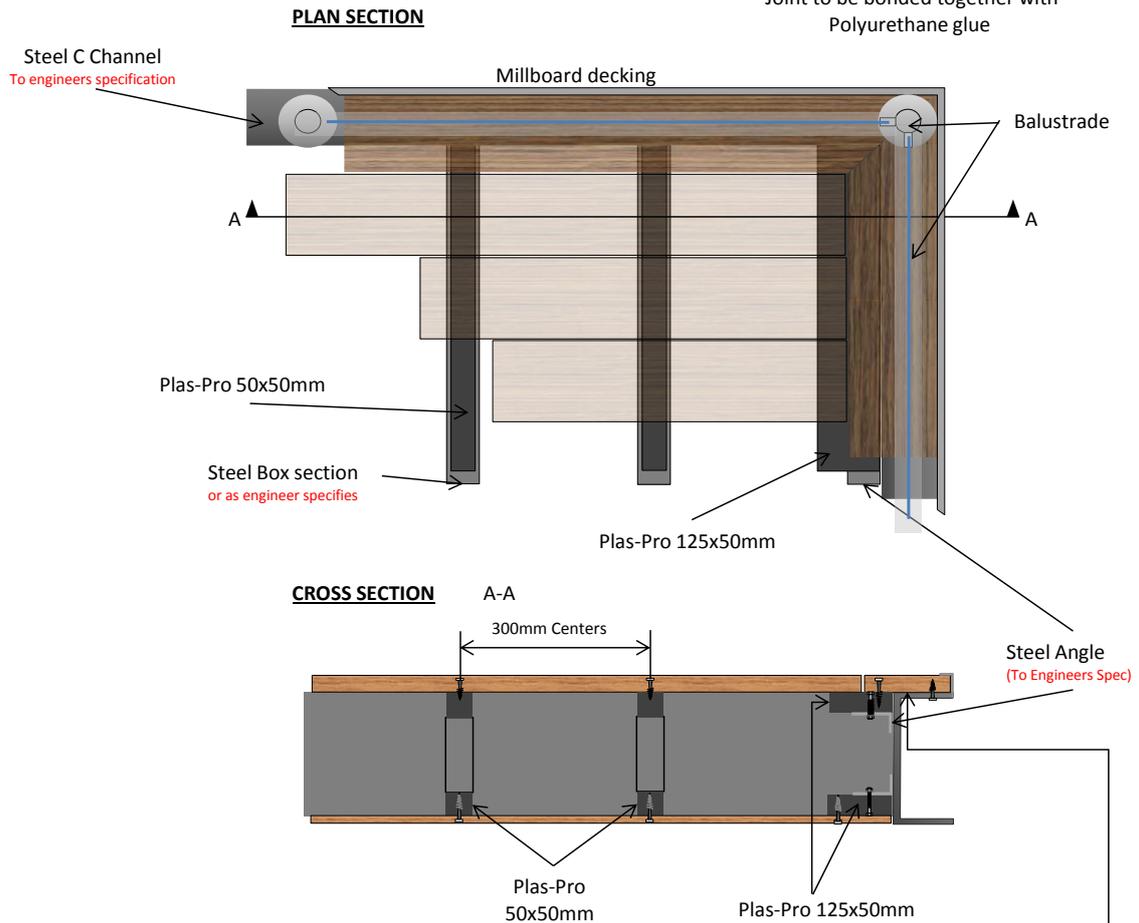

Tip: When working out the depth of a balcony try to work to the widths of full decking boards. This saves on waste

(Enhanced Grain Style Decking Board
176x32x3600mm)

DETAIL. A

Good Practice Note: Mitered deck board joint to be bonded together with Polyurethane glue

NOTE: Glue the deck board board to the steel and also screw it to the 125x50mm Plas-Pro. Use a MS Polymer type adhesive. If required it could be screwed from the back through the steel as well
