

- 1 - 25x50mm Plas-Pro or Timber batten at 400mm centres
- 2 - 25x50mm Plas-Pro or Timber cross batten at 400mm centres
- 3 - Perforated Closure
- 4 - Vertical Starter Trim
- 5 - Example wall with breather membrane

Note: If treated timber battens are being used, we would recommend putting a strip of DPC, joist tape or epdm on to the front of the battens
